

Lesson 03 Demo 05

Adding Tables in the Webpage

Objective: To develop tables using HTML

Tools required: Visual Studio Code, Browser

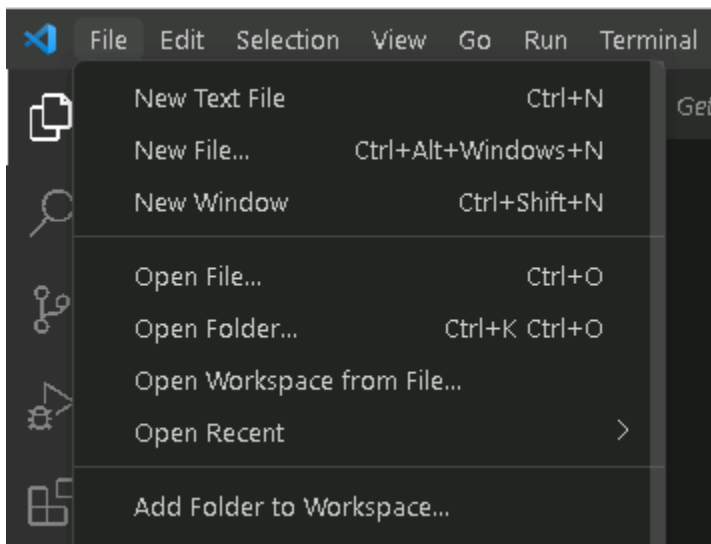

Prerequisites: None

Steps to be followed:

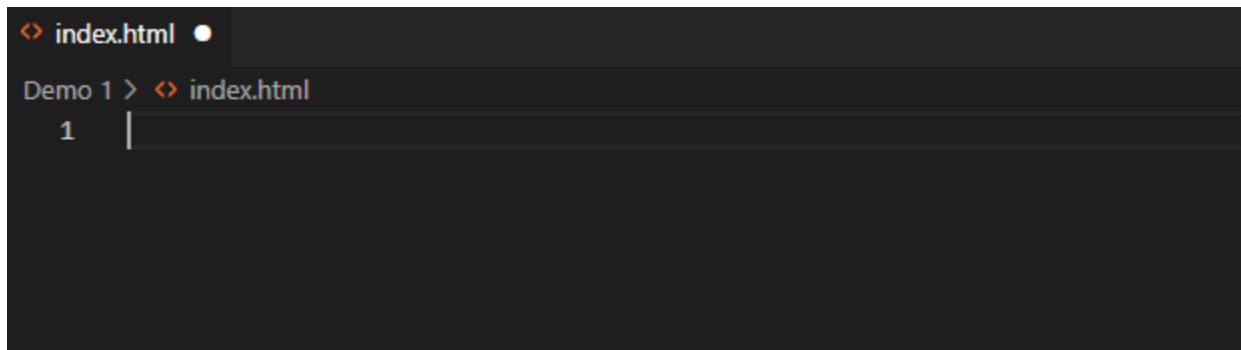

1. Creating the **index.html** file
2. Adding tables in the webpage
3. Viewing the results in your local browser

Step 1: Creating the index.html file

1.1 Open **Visual Studio Code**, right-click on the **File** menu of the code editor, and select **New File**:

1.2 Create a file with the name **index.html**:

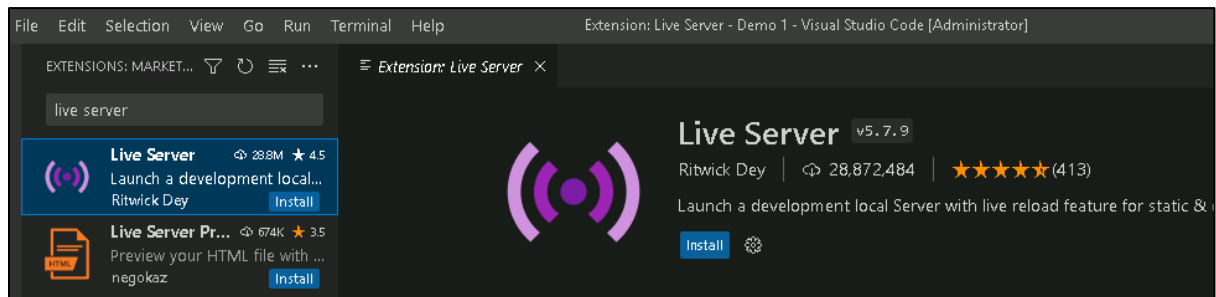

Step 2: Adding titles, headings, and paragraphs in the index.html file.

1.2 Enter the below code to view the table in the webpage:

```
<HTML>
<body>
<table>
  <tr>
    <th>Company</th>
    <th>Name</th>
    <th>Country</th>
  </tr>
  <tr>
    <td>ABC</td>
    <td>Micheal</td>
    <td>Germany</td>
  </tr>
  <tr>
    <td>XYZ</td>
    <td>John</td>
    <td>Mexico</td>
  </tr>
</table>
</body>
<HTML>
```

Step 3: Viewing the results in your local browser

3.1 Go to **Extensions** in **Visual Studio Code** and download **Live Server**:

3.2 Right-click on the **index.html** file of the project, select **Open with Live Server**, and the output obtained will be as shown below:

Company	Contact	Country
Simplilearn	Micheal	Germany
Centro comercial Moctezuma	Francisco Chang	Mexico

A table was successfully added in the webpage.
