

## Lesson 06 Demo 02

### Implement Alerts

**Objective:** To create different alerts in Bootstrap

**Tools required:** Ubuntu Linux VM

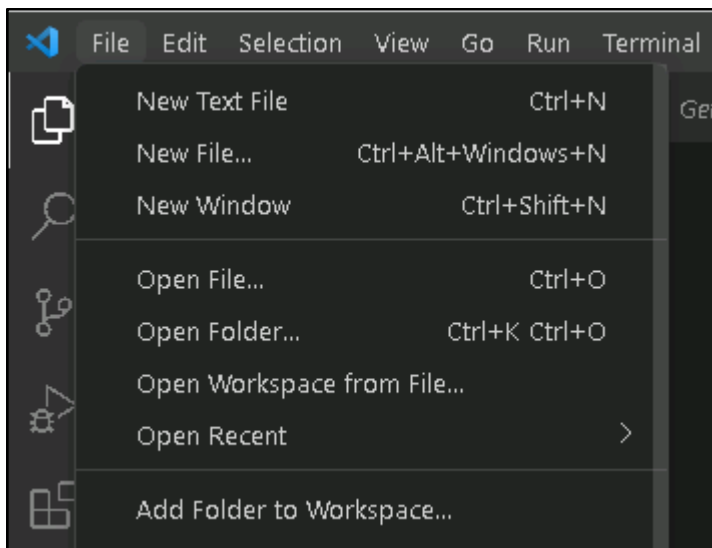

**Prerequisites:** Visual Studio Code, Browser

Steps to be followed:

1. Creating an alerts.html file

#### Step 1: Creating an alerts.html file

**1.1** Open **Visual Studio Code** and right-click on the **File** menu of the code editor and select **New File**:

**1.2** Create **alerts.html** file, and add the code given below:

```

<html>
<head>
  <title>Alert</title>
  <meta charset="utf-8">
  <meta name="viewport" content="width=device-width, initial-scale=1">
  <link rel="stylesheet"
href="https://maxcdn.bootstrapcdn.com/bootstrap/3.4.0/css/bootstrap.min.css">
  <script src="https://ajax.googleapis.com/ajax/libs/jquery/3.4.1/jquery.min.js"></script>
  <script
src="https://maxcdn.bootstrapcdn.com/bootstrap/3.4.0/js/bootstrap.min.js"></script>

</head>
<body>

<div class="container">
  <div class="alert alert-success alert-dismissible" >
    <a href="#" class="close" data-dismiss="alert" aria-label="close">&times;</a>
    <strong>Alert!</strong> This alert box could indicate a message of your type. Click on
the X icon to close this.
  </div>
  <div class="alert alert-info">
    <a href="#" class="close" data-dismiss="alert" aria-label="close">&times;</a>

    <strong>Info!</strong>
  </div>
  <div class="alert alert-warning">
    <a href="#" class="close" data-dismiss="alert" aria-label="close">&times;</a>
    <strong>Warning!</strong>
  </div>
</div>

</body>
</html>

```

1.3 Save the **alerts.html** file in a folder in the desktop:

1.4 Right-click on the **alerts.html** file of the project and select **Open with Live Server**

The output obtained will be as shown below:
