Lesson 03 Demo 02

Adding Title, Headings, Paragraphs in the Webpage

Objective: To develop a webpage that includes title, headings, and paragraphs
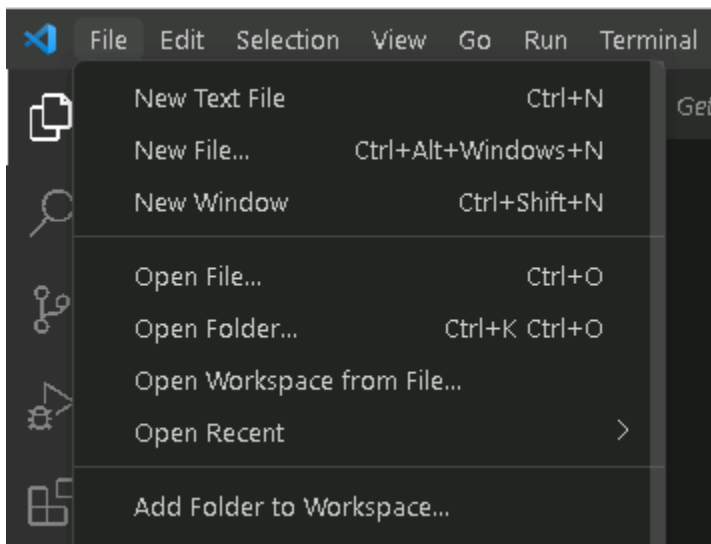

Tools required: Visual Studio Code, Browser

**Prerequisites:** None

Steps to be followed:

1. Creating the **index.html** file
2. Adding titles, headings, and paragraphs in the webpage
3. Viewing the results in the local browser

Step 1: Creating the index.html file

1.1 Open **Visual Studio Code**, right-click on the **File** menu of the code editor, and select **New File:**

1.2 Create a file with the name **index.html:**

```
<> index.html ●
Demo 1 > <> index.html
   1   |
```

Step 2: Adding titles, headings, and paragraphs in the index.html file.

2.1 Enter the below code to view the title, heading, and paragraph in the webpage:

```
<!DOCTYPE html>
<html lang="en">
<head>

<!--Code for the title-->

<title>This is the TITLE</title>
</head>
<body>

<!--Code for the headings-->

   <h1>This is my Webpage</h1>
   <h2>This is my Webpage</h2>
   <h3>This is my Webpage</h3>
   <h4>This is my Webpage</h4>
   <h5>This is my Webpage</h5>
   <h6>This is my Webpage</h6> <br>

<!--Code for the paragraph-->

<p>This is the Webpage. <strong>HTML is used to develop webpages. </strong></p>
</body>
</html>
```
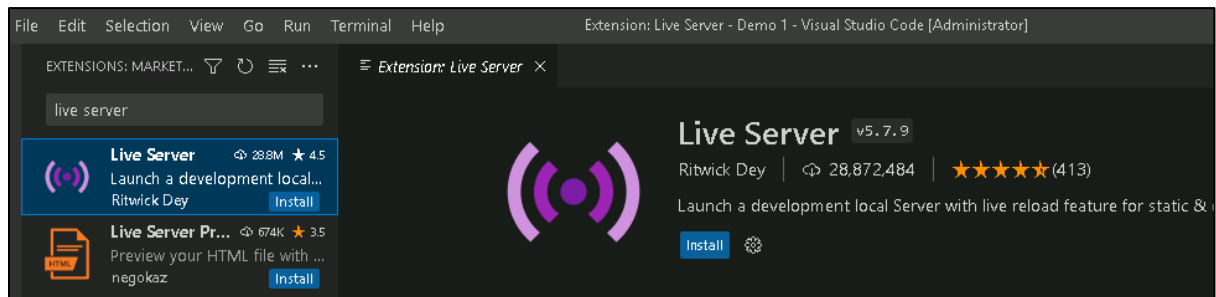

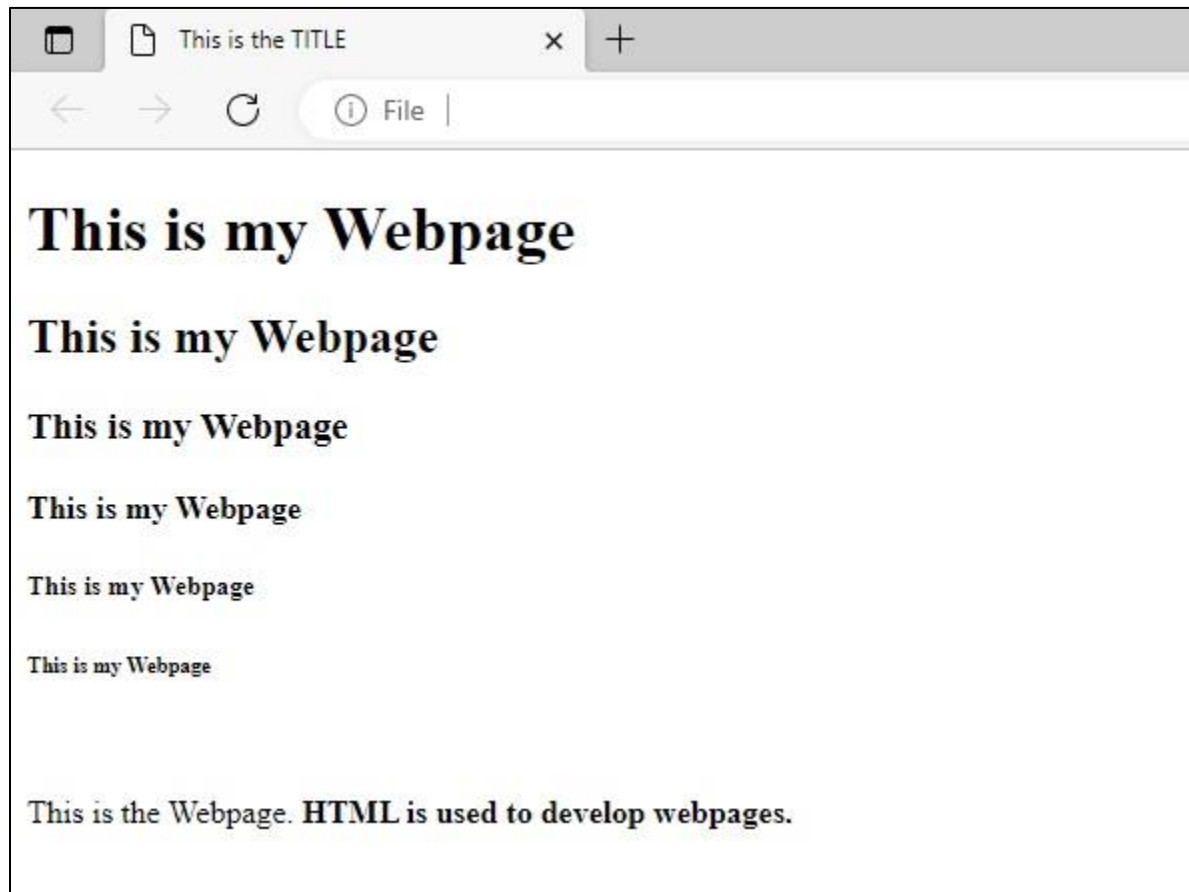

Step 3: Viewing the results in the local browser

3.1 Go to **Extensions** in **Visual Studio Code** and download **Live Server:**

3.2 Right-click on the **index.html** file of the project, select **Open with Live Server,** and the output obtained will be as shown below:

The title, headings, and paragraphs were successfully added to the webpage.
